Total Stories: 12

Status: 12 Active

Table of Contents

Executive Summary	1
Checkpoint Overview	2
Domain 02-court-creation	3
Domain 06-court-reservation	4
Domain 07-owner-confirmation	5
Domain 09-client-profile	6
Domain 11-ui-revamp	7

Executive Summary

Captured new owner-focused court management and reservation ops stories (wizard creation, pricing visibility, active reservation handling, alerts), plus client profile and UI revamp story updates. These additions close UX gaps for pricing accuracy, owner action workflows, and navigation consistency.

Checkpoint Overview

Domains Touched

Domain	Stories Added
02-court-creation	2
06-court-reservation	1
07-owner-confirmation	3
09-client-profile	3
11-ui-revamp	3

Key Decisions

- Added explicit owner reservation operations stories to align slot list UX with the reservation state machine.
- Introduced an always-available alerts panel concept with polling for active reservation workflows.
- Scoped court management improvements to wizard creation and editable pricing defaults to prevent booking mismatches.

Owner Creates Court via Setup Wizard

*As an **organization owner**, I want to **create a court using a guided setup wizard** so that **I can complete each required section step-by-step and avoid missing information**.*

Acceptance Criteria

- Given I am an owner on `/owner/courts`
- When I click "Add New Court"
- Then I land on `/owner/courts/new` with a setup wizard
- And the active step is stored in the `step` query param via nuqs
- Given I am in the wizard
- When I click Next or Back
- Then the `step` query param updates
- And browser back/forward preserves the current step
- Given I am on the Basic step
- When the court name is empty
- Then Next is disabled and inline validation appears
- Given I am on the Location step
- When address or city is missing
- Then Next is disabled and inline validation appears
- Given I am on the Payment step for a paid court
- When the default hourly rate is empty
- Then submission is disabled and an error is shown
- Given all steps are complete
- When I submit the final step
- Then the court is created with reservable settings
- And I am redirected to `/owner/courts/[id]/slots` with a success toast
- Given I am in the wizard

- When I click Cancel
- Then I return to `/owner/courts` without creating a court

Edge Cases

Scenario	Behavior
Invalid or missing `step` param	Default to first step
Refresh mid-wizard	Stay on same step with data preserved
Navigate directly to later step	Show step but prevent submit until required fields complete
Network error on submit	Show error toast and keep data

Form Fields

Field	Type	Required
Name	text	Yes
Address	text	Yes
City	select	Yes
Latitude	number	No
Longitude	number	No
Amenities	multi-select	No
Default Hourly Rate	number	No (Yes if paid)
Currency	select	Yes
Payment Instructions	textarea	No
GCash Number	text	No
Bank Name	text	No
Bank Account Number	text	No

Field	Type	Required
Bank Account Name	text	No

Owner Edits Court Details & Pricing

*As an **organization owner**, I want to **edit my court details and pricing settings** so that **players always see accurate information and rates when booking**.*

Acceptance Criteria

- Given I am on `/owner/courts`
- When I open the actions menu and click "Edit Details"
- Then I navigate to `/owner/courts/[id]/edit`
- Given I am on the edit page
- When the form loads
- Then I see the current court name, address, city, location, amenities, and payment details pre-filled
- Given I change basic information (name, address, city, coordinates)
- When I save changes
- Then the court details update and display on the public court page
- Given I update payment settings (free vs paid, default hourly rate, currency, payment instructions, GCash, bank transfer)
- When I save changes
- Then the court pricing configuration updates successfully
- Given I update the default hourly rate
- When future time slots without a custom price exist
- Then those slots reflect the new default rate in booking flows
- And custom-priced slots keep their overridden price
- Given I save changes
- When the update succeeds
- Then I see a success confirmation and stay on the edit page or return to `/owner/courts`

Edge Cases

Scenario	Behavior
Court not found	Show 404 or redirect to courts list
Not court owner	Show forbidden error and redirect
Switch to free court	Default rate is cleared and pricing displays as Free
Disable payment methods	Corresponding details are cleared
Network error	Show error toast and keep form values

Form Fields

Field	Type	Required
Name	text	Yes
Address	text	Yes
City	select	Yes
Latitude	number	No
Longitude	number	No
Amenities	multi-select	No
Free vs Paid	radio	Yes
Default Hourly Rate	number	No (Yes if paid)
Currency	select	Yes
Payment Instructions	textarea	No
GCash Number	text	No
Bank Name	text	No
Bank Account Number	text	No

Field	Type	Required
Bank Account Name	text	No

Player Sees Correct Pricing During Booking

*As a **player**, I want to **see accurate pricing for paid courts during discovery and booking** so that **I understand the correct amount due before confirming a reservation**.*

Acceptance Criteria

- Given I am on a reservable court detail page
- When the court has a default hourly rate
- Then the booking sidebar shows the correct price per hour
- Given a time slot has no custom price
- When I view available slots
- Then the slot price uses the court’s default hourly rate
- Given a time slot has its own custom price
- When I view available slots
- Then the slot price shows the custom price instead of the default
- Given I select a time slot
- When I view the booking summary
- Then the total amount uses the slot’s custom price or the court default
- Given I complete a paid reservation
- When I reach the payment page
- Then the amount due reflects the slot’s custom price or the court default
- Given the court is marked free
- When I view the booking sidebar or slots
- Then pricing displays as "Free" with no currency amount

Edge Cases

Scenario	Behavior
Default rate updated after slots exist	Slots without custom price reflect the new rate
Slot missing currency	Use court default currency
Default rate missing and slot price missing	Treat as Free
Mixed custom and default prices	Each slot displays its effective price

Owner Sees Accurate Slot Reservation Status

*As an **organization owner**, I want **slot list rows to show the correct reservation status and quick actions** so that **I can respond quickly without misleading payment indicators**.*

Acceptance Criteria

- Given a slot is `HELD` and the reservation status is `AWAITING_PAYMENT`
- When I view the slot list
- Then the status label reads "Awaiting payment"
- And the payment marker is not shown
- And quick actions show: **View Reservation** and **Cancel/Expire**
- Given a slot is `HELD` and the reservation status is `PAYMENT_MARKED_BY_USER`
- When I view the slot list
- Then the status label reads "Payment marked"
- And quick actions show: **Confirm** and **Reject**
- And the reject action requires a reason before submission
- Given a slot is `AVAILABLE`, `BOOKED`, or `BLOCKED`
- When I view the slot list
- Then no payment indicators or confirmation actions appear
- Given I confirm, reject, or cancel from the slot list
- When the action succeeds
- Then the slot list refreshes with the updated status
- And the pending badge count updates in the sidebar
- Given the slot list is loaded
- When a slot is `HELD`
- Then the UI uses the reservation status from the backend (not just slot status)
- And if no reservation is returned, the UI shows a neutral "Held" label with no actions

Edge Cases

Scenario	Behavior
Reservation expired while viewing	Label updates to "Expired" on refresh/poll
Duplicate actions	Buttons disable while mutation is pending
Network error on action	Show error toast and keep current state
Missing reservation link	Hide quick actions and show "Held" badge

Active

Owner Manages Active Reservations with TTL

*As an **organization owner**, I want a **dedicated page for active reservations with TTL** so that **I can track pending payments, confirm marked payments, and respond before reservations expire**.*

Acceptance Criteria

- Given I am an owner
- When I navigate to `/owner/reservations/active`
- Then I see a list of active reservations grouped by status
- And each reservation links to `/owner/reservations/[id]`
- Given a reservation is `AWAITING_PAYMENT`
- When I view the active list
- Then it is labeled "Awaiting payment" with a visible TTL countdown
- Given a reservation is `PAYMENT_MARKED_BY_USER`
- When I view the active list
- Then it is labeled "Payment marked" with the player details
- Given a reservation is `AWAITING_PAYMENT`
- When I view the active list
- Then I can **View Reservation** or **Cancel/Expire**
- Given a reservation is `PAYMENT_MARKED_BY_USER`
- When I view the active list
- Then I can **Confirm** or **Reject** with a required reason
- Given the TTL expires

- When the list refreshes or polls
- Then the reservation is marked `EXPIRED` and removed from the active list
- And the slot becomes available again
- Given I am on the active reservations page
- When I use the status filter
- Then I can filter by `AWAITING_PAYMENT`, `PAYMENT_MARKED_BY_USER`, or `ALL`

Edge Cases

Scenario	Behavior
No active reservations	Show empty state message
Reservation updated by another owner	List reflects latest status on refresh
TTL missing	Hide countdown and show "No TTL" badge
Network error	Show retry action

US-07-05

Active

Owner Reservation Alerts Panel

*As an **organization owner**, I want a **floating reservation alerts panel** so that **I can see active and newly created reservations, respond quickly, and jump to details when needed**.*

Acceptance Criteria

- Given I am on any owner screen
- When I open the alerts panel
- Then a draggable floating card appears with active reservations
- And the panel can be collapsed or dismissed
- Given the panel is open
- When 15 seconds pass
- Then the list refreshes automatically

- And reservations created since the last poll are highlighted as "New"
- Given the panel lists reservations
- Then each row shows: player name, court name, slot time, status badge, TTL countdown (if applicable)
- And each row links to `/owner/reservations/[id]`
- Given a reservation is `AWAITING_PAYMENT`
- Then quick actions show **View** and **Cancel/Expire**
- Given a reservation is `PAYMENT_MARKED_BY_USER`
- Then quick actions show **Confirm** and **Reject** (requires reason)
- Given there are no active reservations
- Then the panel shows a friendly empty state with a link to `/owner/reservations/active`

Edge Cases

Scenario	Behavior
Polling error	Show inline retry with last updated time
Drag off-screen	Panel snaps back within viewport
Multiple new reservations	Badge shows count of new items

Domain 09-client-profile

US-09-01

Active

Player Views Profile

*As a **player**, I want to **view my profile information** so that **I can see what contact details will be shared with court owners**.*

Acceptance Criteria

- Given I am authenticated
- When I navigate to `/account/profile`
- Then I see my profile page with current information
- Given I am on the profile page
- When my profile loads
- Then I see:
- Display Name (or placeholder if empty)
- Email (or empty)
- Phone Number (or empty)
- Avatar (if set)
- Given I navigate to the profile page
- When the profile is loading
- Then I see a skeleton loading state
- And the form is not interactive
- Given I am a new user without a profile
- When I visit the profile page
- Then a profile is automatically created for me
- And I see empty fields ready to fill
- Given I am on the profile page
- When my profile is incomplete (missing name OR missing both email and phone)
- Then I see a warning/info message
- And the message explains what's needed for booking

Edge Cases

Scenario	Expected Behavior
New user, no profile	Auto-create empty profile
Network error loading	Show error state with retry
Session expired	Redirect to login

US-09-02

Active

Player Updates Profile

*As a **player**, I want to **update my profile information** so that **court owners have accurate contact details when I make reservations**.*

Acceptance Criteria

- Given I am on the profile page
- When I modify any field (displayName, email, phone)
- Then the "Save Changes" button becomes enabled
- Given I am editing my profile
- When I enter invalid data:
- Display name: empty or > 100 chars
- Email: invalid format
- Phone: > 20 chars
- Then I see validation error messages
- And I cannot save until fixed
- Given I have made valid changes
- When I click "Save Changes"
- Then I see a loading indicator
- And on success, I see a success toast "Profile updated successfully"
- And the form resets to non-dirty state
- Given I have unsaved changes
- When I navigate away from the page
- Then I can leave (no blocking)
- Note: Optional UX enhancement to warn about unsaved changes

- Given I am on the profile page
- When I see the avatar section
- Then I see my current avatar (or initials placeholder)
- And I see an upload button (non-functional in this phase)
- Note: Avatar upload deferred to future enhancement

Edge Cases

Scenario	Expected Behavior
Save with empty required field	Show validation error
Network error on save	Show error toast, keep form state
Concurrent update	Last write wins (acceptable for MVP)
Very long input	Truncate/reject at validation

US-09-03

Active

Profile Completeness for Booking

*As a **player**, I want to **be guided to complete my profile before booking** so that **court owners can contact me about my reservation**.*

Acceptance Criteria

- Given I have a complete profile (name + email or phone)
- When I am on the booking page (`/courts/[id]/book/[slotId]`)
- Then I see my profile information displayed
- And the "Reserve" button is enabled
- And I can complete my booking
- Given I have an incomplete profile
- When I am on the booking page
- Then I see a warning message:
- And I see a link/button to go to profile page
- And the "Reserve" button is disabled

- Given I am on the booking page with incomplete profile
- When I click the link to complete my profile
- Then I am taken to `/account/profile`
- And after completing profile, I can navigate back to booking
- Note: Optional enhancement to auto-redirect back
- Given I attempt to create a reservation via API
- When my profile is incomplete
- Then the API returns error: `INCOMPLETE_PROFILE`
- And the error message says: "Please complete your profile before booking"
- Given the frontend check passes but backend rejects
- When reservation creation fails due to incomplete profile
- Then I see an error message guiding me to complete profile
- And I am not charged or penalized

Edge Cases

Scenario	Expected Behavior
Profile null (not loaded yet)	Treat as incomplete, show loading
Name only, no contact	Show "add email or phone" message
Email only, no name	Show "add display name" message
Both email and phone missing	Show "add email or phone" message
Profile loads after page	Re-evaluate completeness
API race condition	Backend is source of truth

Unified Navigation Shells

*As a **platform user**, I want **consistent navigation between public and authenticated areas** so that **I can move through the product without confusion**.*

Acceptance Criteria

- Given I am on a public route (`/`, `/courts`, `/courts/[id]`)
- When I view the header
- Then I see a consistent navbar (logo, browse courts, auth/user actions)
- And no sidebar is displayed on public routes
- Given I am authenticated and on an app route (`/home`, `/reservations`, `/account/profile`, `/owner/*`, `/admin/*`)
- When I view the layout
- Then I see a sidebar with role-based navigation
- And the active item is clearly highlighted
- Given I am a player
- When I view the sidebar
- Then I see player routes only
- Given I am an owner
- When I view the sidebar
- Then I see owner routes in addition to player routes
- Given I am an admin
- When I view the sidebar
- Then I see admin routes in addition to player routes
- Given I am on mobile
- When I open the navigation
- Then I see the same links as desktop without missing actions

Edge Cases

Scenario	Behavior
Auth state changes	Navbar or sidebar updates without reload
Long org/user names	Truncate with ellipsis without layout shift
User has owner + admin	Both dashboards appear in navigation
Unrecognized role	Default to player navigation

US-11-02

Active

Full-Width Responsive Layouts

*As a **user on any device**, I want **full-width layouts with consistent padding** so that **content remains readable and visually stable**.*

Acceptance Criteria

- Given I am on any route
- When I view the page layout
- Then the main content spans the available width
- And consistent horizontal padding is applied across breakpoints
- Given I am on a discovery page using the bento grid
- When I resize the screen
- Then the grid adapts to 12 columns (desktop), 6 columns (tablet), and 1 column (mobile)
- Given I am on mobile (320px width)
- When I scroll the page
- Then no horizontal scrolling is required

Edge Cases

Scenario	Behavior
Long tables or cards	Content wraps or provides an internal scroll
Sticky headers	Header does not overlap page content

Scenario	Behavior
Drawer open	No layout shift on open/close

US-11-03

Active

Cohesive Color + Typography

*As a **user**, I want **visual consistency in color and typography** so that **the product feels calm, professional, and easy to scan**.*

Acceptance Criteria

- Given I view any page
- When I scan headings and body text
- Then headings and buttons use Outfit
- And body content and inputs use Source Sans 3
- Given I view any page
- When primary actions are present
- Then only 1–2 primary (teal) CTAs appear per screen
- And orange is reserved for links, availability, and highlights
- And red is reserved for destructive or error states
- Given I view cards, panels, and navigation shells
- When I inspect surfaces and borders
- Then warm neutral backgrounds dominate
- And focus rings use teal for consistency

Edge Cases

Scenario	Behavior
Teal + orange actions adjacent	Avoid side-by-side brand buttons
Low-contrast text	Adjust to meet WCAG AA
Disabled states	Use muted neutrals, not brand colors
