10. Domain 07: Owner Confirmation (2 Stories)

11. Domain 08: Future P2P Flow (Overview)

12. Implementation Roadmap

13. Appendices

1. Executive Summary

Project Overview

KudosCourts is a court booking platform that connects pickleball players with court owners through a peer-to-peer payment model. This document outlines 24 user stories covering the complete MVP journey from user onboarding through court booking and owner confirmation.

24	9	19
Total Stories	Domains	Active Stories

Key Features Covered

Feature Area	Stories	Status	Priority
User Onboarding	7	**Complete**	P0
Organization Registration	1	**Complete**	P0
Court Creation	4	**Complete**	P0
Owner Dashboard	1	**Complete**	P0
Availability Management	2	**Needs Implementation**	P1
Court Reservation	2	**Needs Implementation**	P1
Owner Confirmation	2	**Needs Implementation**	P1
P2P Reservation (Future)	1	**Deferred**	P2

Key Architectural Decisions

- **Simplified MVP Flow:** Domains 05-07 implement basic end-to-end booking without TTL timers or payment proof uploads, allowing faster shipping while deferring complexity to Domain 08.
- **Backend-First Approach:** Backend implementation for most features is complete. Stories focus on wiring frontend components to existing endpoints.
- **Supersession over Deletion:** Original domain 03 stories are marked superseded but retained for historical reference and context.
- **Domain Split:** Original US-03-03 (owner confirms payment) was split into US-07-01 (view) and US-07-02 (action) for clearer separation of concerns.

2. Checkpoint Overview

Checkpoint 01 documents all user stories created for the KudosCourts MVP through the owner confirmation flow. This checkpoint represents the core booking functionality required for the platform to operate end-to-end.

Stories Covered

This checkpoint includes stories from the following domains:

Domain ID	Domain Name	Stories	Status
00	Onboarding	7 + 1 bug fix	**Complete**
01	Organization	1	**Complete**
02	Court Creation	4	**Complete**
03	Court Reservation (Original)	3	**Superseded by 06, 07**
04	Owner Dashboard	1	**Complete**
05	Availability Management	2	**Active - Needs Implementation**
06	Court Reservation (Simplified)	2	**Active - Needs Implementation**
07	Owner Confirmation	2	**Active - Needs Implementation**
08	P2P Reservation Confirmation	1 overview	**Deferred**

Domain Evolution: Supersession Chain

```
03-court-reservation (original) │ ├── US-03-01 ──▶ US-06-01 (simplified, free court booking) ├── US-03-02 ──▶ US-06-02 (simplified, no TTL timer) └── US-03-03 ──▶ US-07-01 + US-07-02 (split into view + action)
```

New Domain Structure (05-08)

```
05-availability-management 06-court-reservation 07-owner-confirmation │ │ │ Owner creates slots Player books slots Owner confirms │ │ │ └──────────────── Simplified MVP Flow ────────────────┘ │ ▼ 08-p2p-reservation-confirmation (Future: Full TTL, proof upload)
```

Implementation Priority

Next Steps: Domains 05, 06, and 07 are the highest priority for implementation as they enable the core booking functionality. Backend is largely complete; frontend wiring and one new endpoint (`timeSlot.getForCourt`) are required.

Story Count Summary

Category	Count	Details
Total Stories	24	All stories across all domains
Active	19	Ready for implementation or complete
Superseded	3	US-03-01, US-03-02, US-03-03
Fixed	1	00-08 bug fix (legacy dashboard redirect)
Deferred	1	08-00 overview (future P2P flow)

3. Domain 00: Onboarding

Domain Overview

The Onboarding feature domain covers the complete user journey from first visit through authenticated platform usage. This includes authentication flows (sign up, sign in, sign out), profile completion, and navigation patterns across all platform areas.

Total Stories: 7 Active + 1 Bug Fix
Status: Complete
PRD Reference: Sections 3, 4, 5, Journey 1

US-00-01

Active

User Authentication Flow

*As a **user**, I want to **sign up, sign in, and sign out** so that **I can access platform features like reservations and profile management**.*

Acceptance Criteria

Sign Up (Email/Password)

Given I am on `/register`
When I submit a valid email and password (min 8 characters)
Then my account is created and I see "Check your email for confirmation"

Sign Up (Magic Link)

Given I am on `/magic-link`
When I submit a valid email
Then a magic link is sent and I see "Check your email for the login link"

Sign In

Given I am on `/login` with valid credentials
When I submit the form
Then I am authenticated and redirected to `/home` (or redirect param if present)

Sign Out

Given I am authenticated
When I click "Sign Out" in the user dropdown
Then my session is cleared and I am redirected to `/`

Redirect Preservation

Given I am on a protected page as a guest
When I am redirected to `/login`
Then the original URL is preserved in query param
And after successful login I return to that page

Edge Cases

Scenario	Behavior
Invalid email format	Show validation error inline
Password too short (< 8 chars)	Show validation error inline
Email already registered	Show "Email already in use" error
Invalid credentials on login	Show "Invalid email or password" error
Expired magic link	Show "Link expired, request a new one" with retry CTA
Network error during auth	Show toast error with retry option

UI Components

Page	Route	Components
Login	`/login`	LoginForm, links to register/magic-link
Register	`/register`	RegisterForm, link to login
Magic Link	`/magic-link`	MagicLinkForm, link to login

US-00-02

Active

User Completes Profile

*As a **user**, I want to **complete my profile with minimal information** so that **I can make reservations and optionally become a court owner**.*

Acceptance Criteria

View Profile

Given I am authenticated
When I navigate to `/account/profile`
Then I see my current profile information (display name, email, phone, avatar)

Update Profile

Given I am on `/account/profile`
When I update any field and click Save
Then my profile is updated and I see a success toast

Profile Auto-Creation

Given I am a new user with no profile
When I first access `/account/profile` or `/home`
Then a profile is automatically created for me (empty fields)

Minimum Required for Booking

Given I try to book a court
When my profile is missing display name AND (email AND phone)
Then I am prompted to complete minimum fields before proceeding

Become Owner CTA

Given I am on `/account/profile` and have no organization
When I view the page
Then I see a "Want to list your courts?" CTA section

Profile Fields

Field	Type	Required	Validation
Display Name	text	For booking	1-100 chars
Email	email	Either email or phone	Valid email format
Phone Number	tel	Either email or phone	Max 20 chars
Avatar URL	url	No	Valid URL

Profile Completeness

Minimum for Booking:

- Display name (required)
- Email OR phone (at least one)

Complete Profile: Display name, Email, Phone, Avatar (optional, not counted)

US-00-03

Active

User Navigates Public Area

*As a **user**, I want to **navigate the public discovery area with clear wayfinding** so that **I can find courts and understand where I am in the platform**.*

Acceptance Criteria

Navbar (Guest)

Given I am not authenticated
When I view the discovery navbar
Then I see: Logo (links to `/`), Browse Courts, Sign In button

Navbar (Authenticated)

Given I am authenticated
When I view the discovery navbar
Then I see: Logo (links to `/home`), Browse Courts, User dropdown
And the dropdown shows: My Reservations, Profile, Owner Dashboard (if owner), Admin Dashboard (if admin), Sign Out

Logo Navigation

Authenticated → Logo clicks navigate to `/home`
NOT authenticated → Logo clicks navigate to `/`

Court Detail Breadcrumbs

Given I am on `/courts/[id]`
When I view the page header
Then I see breadcrumbs: Home > Courts > {Court Name}

Booking Flow Breadcrumbs

Given I am on `/courts/[id]/book/[slotId]`
When I view the page header
Then I see breadcrumbs: Courts > {Court Name} > Book
And I see a back button to `/courts/[id]`

Navigation Patterns

Page	Breadcrumbs	Back Button
`/`	No	No
`/courts`	No	No
`/courts/[id]`	Home > Courts > {Name}	No
`/courts/[id]/book/[slotId]`	Courts > {Name} > Book	Yes, to `/courts/[id]`

US-00-04 through US-00-07

Active

Additional Onboarding Stories

The following stories complete the onboarding domain:

- **US-00-04:** User Navigates Account Area (profile, reservations)
- **US-00-05:** Owner Navigates Dashboard (sidebar navigation, breadcrumbs)
- **US-00-06:** Admin Navigates Dashboard (sidebar, claims badge)
- **US-00-07:** Home Page for Authenticated Users (welcome, quick actions, upcoming reservations)

4. Domain 01: Organization

Domain Overview

The Organization feature domain covers the self-registration flow for users who want to become court owners. This enables any authenticated user to create an organization, which is a prerequisite for listing and managing courts on the platform.

Total Stories: 1 Active
Status: Complete
PRD Reference: Section 6, Journey 3

US-01-01

Active

Owner Registers Organization

*As a **user**, I want to **create an organization** so that **I can list and manage my pickleball courts on the platform**.*

Acceptance Criteria

Access Onboarding

Given I am authenticated and have no organization
When I click the "Become a Court Owner" CTA on `/home` or `/account/profile`
Then I navigate to `/owner/onboarding`

Create Organization

Given I am on `/owner/onboarding`
When I enter an organization name and submit
Then an organization is created with auto-generated slug
And I am redirected to `/owner`

Custom Slug

Given I am on `/owner/onboarding`
When I provide a custom slug
Then the system validates it is unique
And uses my custom slug if valid

Auto-Generated Slug

Given I submit organization name "My Sports Complex"
When no custom slug is provided
Then the slug is generated as "my-sports-complex"

Slug Conflict

Given the slug "my-courts" already exists
When I try to use it
Then the system appends a number: "my-courts-1"

Already Has Organization

Given I already have an organization
When I try to access `/owner/onboarding`
Then I am redirected to `/owner`

Form Fields

Field	Type	Required	Validation
Organization Name	text	Yes	1-150 chars
Slug	text	No	Lowercase, alphanumeric, hyphens only, 1-100 chars

Post-Creation Flow

```
/owner/onboarding → [Create Organization] → /owner (Dashboard) →
/owner/courts/new
```

API Endpoint

Endpoint	Method	Input	Output
`organization.create`	Mutation	`{ name, slug? }`	`{ organization, profile }`

5. Domain 02: Court Creation

Domain Overview

The Court Creation feature domain enables two types of court listings: **Curated Courts** (created by admins for discovery) and **Owner Courts** (created by owners for reservations).

Total Stories: 4 Active
Status: Complete
PRD Reference: Section 10, Journeys 3-4

US-02-01 Active

Admin Creates Curated Court

*As an **admin**, I want to **create a curated court listing** so that **players can discover courts before owners onboard the platform**.*

Key Acceptance Criteria

- Access form from `/admin/courts` via "Add Court" button
- Fill required fields (name, address, city) to create court
- Court created with `type: CURATED`, `claimStatus: UNCLAIMED`
- Add photos, amenities, and contact socials (Facebook, Viber, Instagram, website)
- Court appears in discovery with "Contact to Book" label (not reservable)

Form Fields

Required: Name, Address, City

Optional: Description, Photos, Amenities, Facebook URL, Viber, Instagram, Website

US-02-02

Active

Owner Creates Court

*As an **organization owner**, I want to **create my own court** so that **players can discover and book it through the platform**.*

Key Acceptance Criteria

- Access form from `/owner/courts` via "Add Court" button
- Fill required fields and submit to create court
- Court created with `type: RESERVABLE`, linked to organization
- Configure default pricing (hourly rate and currency)
- Redirected to `/owner/courts/[id]/slots` after creation to manage availability
- Court appears in discovery (shows "No availability" until slots are added)
- If no organization exists, redirect to `/owner/onboarding`

Post-Creation Flow

```
/owner/courts/new → [Create Court] → /owner/courts/[id]/slots → Add time slots
```

US-02-03 & US-02-04

Active

Additional Court Creation Stories

- **US-02-03:** Admin Data Entry Form (enhanced form for bulk court data)
- **US-02-04:** CSV Import Script (import courts from spreadsheet)

6. Domain 04: Owner Dashboard

Domain Overview

The Owner Dashboard provides organization owners with a real-time overview of their courts, reservations, and key metrics. This is the central hub for court management.

Total Stories: 1 Active
Status: Complete
PRD Reference: Section 12, Journey 5

US-04-01 Active

Owner Views Real Dashboard Data

*As an **organization owner**, I want to **view real-time dashboard statistics** so that **I can monitor my courts' performance and pending reservations**.*

Key Metrics Displayed

- **Total Courts:** Count of all courts owned
- **Active Courts:** Courts with at least one available slot
- **Pending Confirmations:** Count of reservations awaiting payment confirmation
- **Recent Reservations:** List of latest 5 reservations with status
- **Quick Actions:** Links to Add Court, Manage Slots, View Reservations

7. Domain 05: Availability Management

Domain Overview

The Availability Management domain enables organization owners to create and manage time slots for their courts. This is a prerequisite for the reservation flow - courts cannot accept bookings without available time slots.

Total Stories: 2 Active
Status: Needs Implementation
PRD Reference: Section 9, Journey 5

Implementation Status

Priority: P1 - High Priority
Backend: Mostly complete (needs `getForCourt` endpoint)
Frontend: UI complete, hooks use mock data, needs wiring to tRPC

US-05-01

Active

Owner Creates Time Slots

*As an **organization owner**, I want to **create time slots for my courts** so that **players can discover and book availability**.*

Acceptance Criteria

Access Slot Management

Given I am an owner with at least one court
When I navigate to `/owner/courts/[id]/slots`
Then I see the slot management page with calendar and slot list

Create Single Slot

Given I am on the slots page
When I click "Add Slot" and enter start time, end time, and optional price
Then a single slot is created with status `AVAILABLE`
And the slot appears in the list immediately

Create Bulk Slots

Given I am on the slots page
When I click "Add Slots" and configure date range, days of week, time range, duration, and price
Then multiple slots are created based on the configuration
And I see a preview before confirming
And a success toast shows "Created X slots successfully"

Set Pricing

Given I am creating slot(s)
When I set a price (priceCents > 0) and currency
Then the slot(s) are created as paid slots
When I leave price empty or set to 0
Then the slot(s) are created as free slots (priceCents = NULL)

Overlap Validation

Given I am creating a slot
When the time range overlaps with an existing slot for the same court
Then the creation fails with error "Time slot overlaps with existing slot"
And the error clearly indicates which slot(s) conflict

Frontend Changes Required

Component	Current State	Action Required
`use-slots.ts`	Returns mock data with setTimeout	Wire to `trpc.timeSlot.createBulk`
BulkSlotModal	UI complete	Connect to real hook
SlotList	UI complete	Connect to real data source

Backend Endpoints

Endpoint	Status	Notes
`timeSlot.create`	**Complete**	Single slot creation
`timeSlot.createBulk`	**Complete**	Max 100 slots per call
`timeSlot.getForCourt`	**NEW - Needs Creation**	Get all slots for owner view
`timeSlot.block`	**Complete**	Block available slot
`timeSlot.unblock`	**Complete**	Unblock blocked slot
`timeSlot.delete`	**Complete**	Delete available slot

US-05-02

Active

Owner Views and Manages Slots

*As an **organization owner**, I want to **view and manage all time slots** so that **I can block, unblock, or delete slots as needed**.*

Key Features

- View all slots across all statuses (AVAILABLE, HELD, BOOKED, BLOCKED)
- See player information on booked slots (name, phone from reservation snapshot)
- Block/unblock slots for maintenance or private use
- Delete available slots
- Filter slots by date range and status

Slot Status Reference

Status	Description	Owner Actions
`AVAILABLE`	Open for booking	Block, Delete
`HELD`	Temporarily locked (paid reservation pending)	View player info
`BOOKED`	Confirmed reservation	View player info
`BLOCKED`	Manually blocked by owner	Unblock

NEW Backend Requirement: timeSlot.getForCourt

The current `timeSlot.getAvailable` only returns AVAILABLE slots for player discovery. Owners need to see ALL slots regardless of status.

Input: `{ courtId: string, startDate: string, endDate: string }`
Output: `TimeSlotWithPlayerInfo[]` - includes player name and phone for HELD/BOOKED slots

8. Domain 06: Court Reservation (Simplified)

Domain Overview

The Court Reservation domain enables players to discover and book pickleball courts. This is the core player-facing booking flow that connects court discovery to confirmed reservations.

Total Stories: 2 Active
Status: Needs Implementation
PRD Reference: Section 7 (Journeys 2-3), Section 8
Supersedes: Domain 03 (US-03-01, US-03-02)

Simplified Scope

This version defers TTL timers, payment proof uploads, and expiration handling to Domain 08 (P2P Reservation Confirmation). Focus is on essential end-to-end booking.

Deferred to Domain 08: 15-minute TTL countdown, payment proof upload (reference number, notes, image), payment instructions display, expiration handling (cron job), T&C acknowledgement UI

US-06-01

Active

Player Books Free Court

*As a **player**, I want to **book a free court slot** so that **I can reserve court time without any payment**.*

User Flow

```
/courts (discovery) │ ▼ /courts/[id] (court detail) │ ├── View available free slots │ ▼ Click slot → /courts/[id]/book/[slotId] │ ▼ [Reserve] button │ ▼ reservation.create({ timeSlotId }) │ ▼ Success → /reservations/[id] (confirmation) │ ▼ Optional: /reservations (my reservations list)
```

Key Acceptance Criteria

Discover Free Slots

Given I am on a court detail page
When the court has available slots with no price
Then I see time slots with "Free" badge

Authentication Required

Given I am NOT authenticated
When I attempt to book a slot
Then I am redirected to `/login?redirect=/courts/[id]`
And after login, I return to the court page

Profile Requirements

Given I am authenticated
When I attempt to confirm a booking
Then the system checks for minimum profile (displayName + email or phone)
If incomplete, I am prompted to complete profile first

Confirm Booking

Given I am authenticated with complete profile
When I click "Reserve" or "Confirm Booking"
Then a reservation is created via `reservation.create({ timeSlotId })`
And reservation status is immediately `CONFIRMED`
And slot status changes to `BOOKED`
And I see a success message

API Integration

Endpoint	Input	Response (Free Court)
`reservation.create`	`{ timeSlotId: string }`	Reservation with status `CONFIRMED`

Frontend Hook Status

`useCreateReservation` in `src/features/reservation/hooks/use-create-reservation.ts` is already connected to `trpc.reservation.create`. Verify end-to-end flow works.

US-06-02

Active

Player Books Paid Court

*As a **player**, I want to **book a paid court slot** so that **I can reserve premium court time with external payment**.*

Simplified Paid Booking Flow

```
Player selects AVAILABLE slot (priceCents > 0) │ ▼ reservation.create({
timeSlotId }) │ ▼ ┌──────────────────────────────┐ │ Reservation:
AWAITING_PAYMENT │ │ Slot: HELD │ └──────────────────────────────┘ │ ▼ Player
pays externally (GCash, bank, cash) │ ▼ Player clicks "I Have Paid" button │ ▼
reservation.markPayment({ reservationId, termsAccepted: true }) │ ▼
┌──────────────────────────────────┐ │ Reservation: PAYMENT_MARKED_BY_USER│ │
Slot: HELD (still) │ └──────────────────────────────────┘ │ ▼ Awaiting owner
confirmation... (See Domain 07: Owner Confirmation)
```

Key Acceptance Criteria

View Pricing

See time slots with price badges (e.g., "₱200/hr")

Initiate Booking

Given I am authenticated with complete profile
When I click a paid slot and confirm
Then reservation is created with status `AWAITING_PAYMENT`
And slot status changes to `HELD`

View Payment Instructions (Simplified)

Redirected to `/reservations/[id]/payment`
See: Amount due, basic payment methods info
Note: Detailed payment instructions deferred to Domain 08

Mark as Paid

When Player clicks "I Have Paid" button
Then Status changes to `PAYMENT_MARKED_BY_USER`
And Player sees "Awaiting confirmation" message

Reservation Status Reference

Status	Description	Slot State
`CREATED`	Initial (transitional)	-
`AWAITING_PAYMENT`	Paid court, waiting for player	HELD
`PAYMENT_MARKED_BY_USER`	Player clicked "I Have Paid"	HELD
`CONFIRMED`	Reservation complete	BOOKED
`CANCELLED`	Cancelled by player or owner	AVAILABLE
`EXPIRED`	TTL expired (deferred to Domain 08)	AVAILABLE

Frontend Hooks Status

Hook	Status	Action
`useCreateReservation`	**Connected**	Verify works with paid slots
`useMarkPayment`	**May need creation**	Check if exists, create if missing
`useMyReservations`	**Connected**	Verify status transitions

9. Domain 07: Owner Confirmation

Domain Overview

The Owner Confirmation domain enables organization owners to review and action pending reservations. When a player books a paid court and marks payment as complete, the owner must confirm (or reject) the reservation to finalize the booking.

Total Stories: 2 Active
Status: Needs Implementation
PRD Reference: Section 7 Journey 4
Supersedes: Part of US-03-03 (split into view and action)

US-07-01

Active

Owner Views Pending Reservations

*As an **organization owner**, I want to **view pending reservations with full details** so that **I can review booking requests and take appropriate action**.*

Simplified Flow

```
[06] Player books paid court │ ▼ ┌──────────────────────────┐ │
PAYMENT_MARKED_BY_USER │ │ Slot: HELD │ └──────────────────────────┘ │ ▼ [07]
Owner views pending reservations │ ├── Player name, email, phone ├── Court
name ├── Slot date/time ├── Amount │ ▼
┌──────────────────────────────────────────┐ │ Owner Action │ │ │ │ [Confirm
Payment] [Reject] │ └──────────────────────────────────────────┘ │ │ │ │ ▼ ▼
┌──────────────────┐ ┌──────────────────┐ │ CONFIRMED │ │ CANCELLED │ │ Slot:
BOOKED │ │ Slot: AVAILABLE │ └──────────────────┘ └──────────────────┘
```

Key Acceptance Criteria

Access Reservations Page

Given I am an authenticated owner with organization
When I navigate to `/owner/reservations`
Then I see a list of my organization's reservations

Filter by Status

Given I am on the reservations page
When I use the status filter
Then I can filter by: All, Pending, Confirmed, Cancelled
And "Pending" shows `PAYMENT_MARKED_BY_USER` reservations

View Enriched Data

Given I am viewing a reservation
Then I see:
- **Player info:** Name, email, phone (from snapshot)
- **Court:** Court name
- **Slot:** Date, start time, end time
- **Amount:** Price in formatted currency (e.g., "₱200")
- **Status:** Badge showing current status
- **Created:** When the reservation was made

Pending Badge on Sidebar

Given I have pending reservations
When I view the owner sidebar
Then I see a badge count on "Reservations" menu item
And the count matches actual pending count

Dashboard Stat

Given I am on `/owner` dashboard
When I view the stats cards
Then I see "Pending Confirmations: N" with real count
And clicking navigates to `/owner/reservations?status=pending`

Data Requirements: Enriched Reservation DTO

Backend needs to return enriched data including:

- Player info: name, email, phone (from snapshots)
- Court info: courtId, courtName (joined)
- Slot info: startTime, endTime (joined)
- Pricing: amountCents, currency (from slot)
- Metadata: createdAt

Backend Enhancement Required

Endpoint	Current Status	Enhancement Needed
`reservationOwner.getForOrganization`	**Missing Data**	Add court name, slot time, amount by joining related tables
`reservationOwner.getPendingCount`	**Complete**	No changes needed

Known Gap

Current `useOwnerReservations` hook maps data with placeholders: `courtName: "Court"`, `startTime: "--:--"`, `endTime: "--:--"`, `amountCents: 0`. This will be fixed when backend is enhanced.

US-07-02

Active

Owner Confirms or Rejects Reservation

*As an **organization owner**, I want to **confirm or reject payment for reservations** so that **reservations are finalized or slots are released**.*

Key Acceptance Criteria

Confirm Payment

Given I am viewing a pending reservation
When I click "Confirm Payment"
Then Reservation status → `CONFIRMED`
And Slot status → `BOOKED`
And Success toast shown

Reject Payment

Given I am viewing a pending reservation
When I click "Reject" and provide a reason
Then Reservation status → `CANCELLED`
And Slot status → `AVAILABLE`
And Confirmation toast shown

Backend Endpoints (Already Complete)

Endpoint	Status
`reservationOwner.confirmPayment`	Complete
`reservationOwner.reject`	Complete

Audit Trail

Per PRD Section 15.1, all status transitions are logged in `reservation_event` table with reservation ID, from status, to status, triggered by (owner user ID), role, timestamp, and optional notes.

10. Domain 08: P2P Reservation Confirmation (Future)

Domain Overview

Domain 08 represents the full-featured P2P reservation confirmation flow with TTL timers, payment proof uploads, and expiration handling. This domain is **deferred to post-MVP**.

Total Stories: 1 Overview
Status: Deferred
PRD Reference: Section 8 (Complete P2P Flow)

Deferred Items

The following features are deferred from Domains 06 and 07 to this future domain:

- **15-minute TTL countdown:** Requires cron job or edge function
- **Payment proof upload:** Reference number, notes, image upload (S3 integration)
- **Payment instructions display:** Needs owner payment info setup
- **Expiration handling:** Auto-release slots after timer expiration
- **P2P verification flow:** Full feature with proof review
- **Email/SMS notifications:** Integration complexity

Rationale for Deferral

By deferring these features, the MVP can ship with basic end-to-end booking functionality faster. The simplified flow (Domains 06-07) provides the core value proposition while allowing time to properly architect timer infrastructure and payment proof handling.

11. Implementation Roadmap

Current Status

Layer	Status	Notes
Database Schema	**Complete**	All tables exist with proper relationships
Backend Repositories	**Complete**	All CRUD operations implemented
Backend Services	**Complete**	Business logic, ownership verification, validations
tRPC Routers	**Mostly Complete**	Missing: `timeSlot.getForCourt`, enhance `reservationOwner.getForOrganization`
Frontend UI Components	**Complete**	All UI components built and styled
Frontend Hooks	**Partial**	`use-slots.ts` uses mock data, needs wiring

Implementation Priority

Priority 1: Availability Management (Domain 05)

- **Backend:** Add `timeSlot.getForCourt` endpoint
- **Frontend:** Wire `use-slots.ts` to `trpc.timeSlot.createBulk`
- **Frontend:** Wire `useGetSlots` to new `getForCourt` endpoint
- **Testing:** Verify bulk slot creation, overlap detection, pricing

Estimated Effort: 1-2 days

Priority 2: Court Reservation (Domain 06)

- **Frontend:** Verify `useCreateReservation` works end-to-end
- **Frontend:** Add `useMarkPayment` hook if missing
- **Testing:** Test free court booking flow
- **Testing:** Test paid court booking → mark payment flow

Estimated Effort: 1 day

Priority 3: Owner Confirmation (Domain 07)

- **Backend:** Enhance `reservationOwner.getForOrganization` to return enriched data
- **Frontend:** Update `useOwnerReservations` to use real data (remove placeholders)
- **Testing:** Verify pending reservations display correctly
- **Testing:** Test confirm/reject actions

Estimated Effort: 1-2 days

Total Estimated Effort

3-5 days to complete implementation of Domains 05, 06, and 07, enabling full end-to-end booking functionality for the MVP.

Open Questions

- Should TTL timer be implemented before MVP launch or can it wait?
- Do we need email/SMS notifications for reservation status changes?
- What is the minimum viable payment proof? (Currently: just "I Have Paid" button)

12. Appendices

User Personas

Persona	Description	Key Actions
Player	Discovers and books courts through the platform	Browse courts, book slots, mark payment, view reservations
Owner	Organization owner who lists and manages courts	Create courts, manage slots, confirm/reject reservations
Admin	Platform administrator who manages curated courts and claims	Add curated courts, review claims, manage platform

Key Flows Summary

```
Flow 1: Player Journey (Free Court) Guest → Sign Up → Complete Profile → Discover Courts → Select Free Slot → Reserve → Confirmed Flow 2: Player Journey (Paid Court) Authenticated → Discover Courts → Select Paid Slot → Reserve → Mark Payment → Await Owner Confirmation → Confirmed Flow 3: Owner Journey User → Create Organization → Add Court → Create Time Slots → Await Bookings → Confirm Payments Flow 4: Admin Journey Admin Login → Add Curated Court → Publish → Players Discover → Contact Owner Externally
```

Technical Architecture Notes

- **Framework:** Next.js 16 with App Router
- **API Layer:** tRPC for type-safe API calls
- **Database:** PostgreSQL with Drizzle ORM
- **Authentication:** Supabase Auth

- **State Management:** React Query for server state, Zustand for client state
- **Styling:** Tailwind CSS with custom design system
